Monthly Indicators

A RESEARCH TOOL PROVIDED BY THE MASSACHUSETTS ASSOCIATION OF REALTORS®

March 2017

We can comfortably consider the first quarter to have been a good start for residential real estate in 2017. There was certainly plenty to worry over when the year began. Aside from new national leadership in Washington, DC, and the policy shifts that can occur during such transitions, there was also the matter of continuous low housing supply, steadily rising mortgage rates and everincreasing home prices. Nevertheless, sales have held their own in year-overyear comparisons and should improve during the busiest months of the real estate sales cycle.

New Listings were down 13.5 percent for single-family homes and 7.0 percent for condominium properties. Closed Sales increased 2.1 percent for single-family homes and 11.3 percent for condominium properties.

The Median Sales Price was up 6.6 percent to \$350,000 for single-family homes and 8.2 percent to \$334,950 for condominium properties. Months Supply of Inventory decreased 36.8 percent for single-family units and 29.6 percent for condominium units.

The U.S. economy has improved for several quarters in a row, which has helped wage growth and retail consumption increase in year-over-year comparisons. Couple that with an unemployment rate that has been holding steady or dropping both nationally and in many localities, and consumer confidence is on the rise. As the economy improves, home sales tend to go up. It isn't much more complex than that right now. Rising mortgage rates could slow growth eventually, but rate increases should be thought of as little more than a byproduct of a stronger economy and stronger demand.

Median Sales Price

Housing Affordability Index

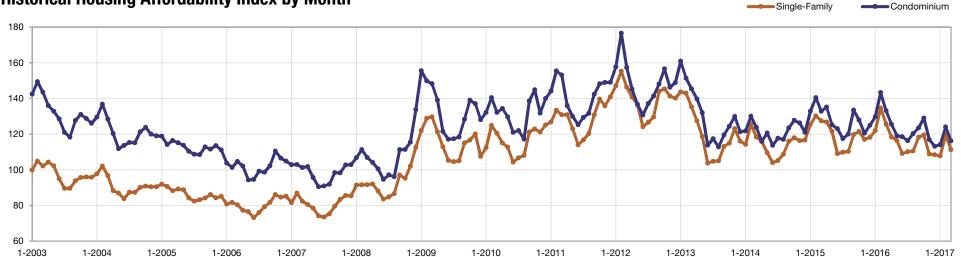

This index measures housing affordability for the region. An index of 120 means the median household income is 120% of what is necessary to qualify for the median-priced home under prevailing interest rates. A higher number means greater affordability.

Glossary of Terms

A research tool provided by the Massachusetts Association of REALTORS®

Median Sales Price A measure of home values in a market area where 50% of activity was higher and 50% was lower than this price point. A measure of how affordable a region's housing is to its consumers. A higher number means greater affordability. The index is based on interest rates, median sales price and average income by county. A measure of the number of homes available for sale at a given time. Once a listing goes pending, sold or is taken off the market, it is no longer considered "active." The availability of homes for sale has a big effect on supply-demand dynamics and home prices. Months Supply of Inventory The inventory of homes for sale (at the end of a given month) divided by the average monthly pending sales from the last 12 months. Final Days on Market Until Sale A measure of how many calendar days pass between when a listing becomes active (not pending) for the last time to the last time it goes pending directly before it is sold. A pending sale is defined as something classified as Pending. Active with a Flag, Contingent or Under Agreement. A measure of the average number of calendar days that pass from when a listing is first listed to when a property goes into the last pending status before it is sold. A measure of the average number of calendar days that pass from when a listing is first listed to when a property goes into the last pending status before it is sold. A measure of how much new supply is coming onto the market from sellers. It is calculated by counting all listings with a list date in the reporting period.	Closed Sales	A measure of home sales that were closed to completion during the report period.
