Monthly Indicators

June 2019

As was widely expected, the Federal Reserve did not change the target range for the federal funds rate – currently set at 2.25 to 2.5 percent – during their June meeting. Although the economy is still performing well due to factors such as low unemployment and solid retail sales, uncertainty remains regarding trade tensions, slowed manufacturing and meek business investments.

New Listings were down 6.0 percent for single-family homes and 0.2 percent for condominium properties. Closed Sales decreased 10.4 percent for single-family homes and 13.8 percent for condominium properties.

The Median Sales Price was up 2.3 percent to \$440,000 for single-family homes and 8.4 percent to \$426,165 for condominium properties. Months Supply of Inventory decreased 14.3 percent for single-family units but increased 8.3 percent for condominium units.

In terms of relative balance between buyer and seller interests, residential real estate markets across the country are performing well within an economic expansion that will become the longest in U.S. history in July. However, there are signs of a slowing economy. The Federal Reserve considers 2.0 percent a healthy inflation rate, but the U.S. is expected to remain below that this year. The Fed has received pressure from the White House to cut rates in order to spur further economic activity, and the possibility of a rate reduction in 2019 is definitely in play following a string of increases over the last several years.

Historical Closed Sales by Month

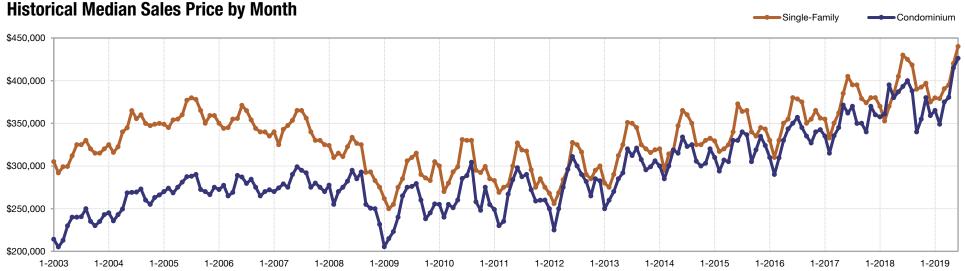

Median Sales Price

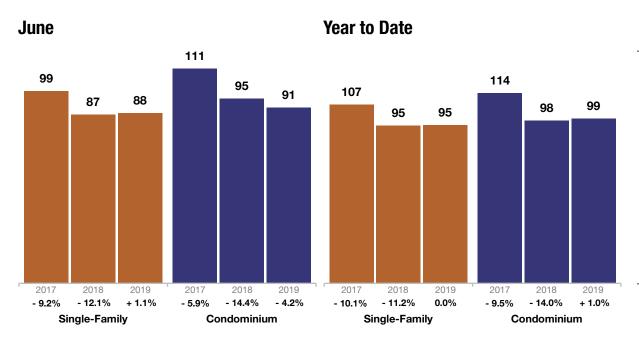

Housing Affordability Index

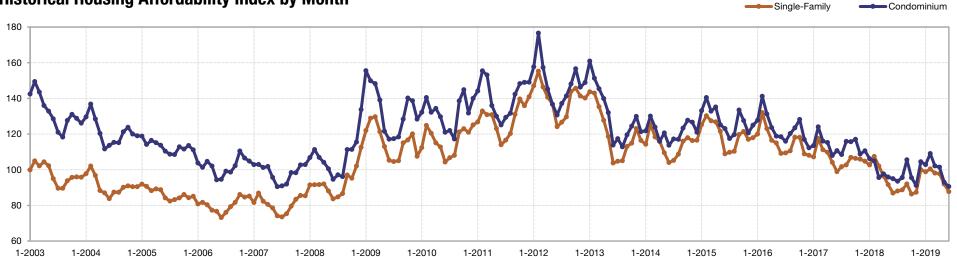

This index measures housing affordability for the region. For example, an index of 120 means the median household income is 120% of what is necessary to qualify for the median-priced home under prevailing interest rates. A higher number means greater affordability.

Historical New Listings by Month

Glossary of Terms

A research tool provided by the Massachusetts Association of REALTORS®

| Closed Sales | A measure of home sales that were closed to completion during the report period. |
|---|--|
| Median Sales Price | A measure of home values in a market area where 50% of activity was higher and 50% was lower than this price point. |
| Housing Affordability Index | A measure of how affordable a region's housing is to its consumers. A higher number means greater affordability. The index is based on interest rates, median sales price and average income by county. |
| Inventory of Homes for Sale | A measure of the number of homes available for sale at a given time. Once a listing goes pending, sold or is taken off the market, it is no longer considered "active." The availability of homes for sale has a big effect on supply-demand dynamics and home prices. |
| Months Supply of Inventory | The inventory of homes for sale (at the end of a given month) divided by the average monthly pending sales from the last 12 months. |
| Final Days on Market Until Sale | A measure of how many calendar days pass between when a listing becomes active (not pending) for the last time to the last time it goes pending directly before it is sold. A pending sale is defined as something classified as Pending, Active with a Flag, Contingent or Under Agreement. |
| Cumulative Days on Market Until Sale | A measure of the average number of calendar days that pass from when a listing is first listed to when a property goes into the last pending status before it is sold. |
| Percent of Original List Price Received | This is calculated as Total Sold Dollars (all sold prices added together) divided by Total Original Price (all original list prices added together). |
| New Listings | A measure of how much new supply is coming onto the market from sellers. It is calculated by counting all listings with a list date in the reporting period. |
