

Monthly Indicators

A RESEARCH TOOL PROVIDED BY THE MASSACHUSETTS ASSOCIATION OF REALTORS®

June 2023

Temperatures are heating up, yet the U.S. housing market remains cooler than usual for this time of year due to a combination of low inventory and higher borrowing costs, which have restricted market activity going into the summer homebuying season. According to the latest data from the National Association of REALTORS® (NAR), national existing-home sales climbed 0.2% from the previous month but were down 20.4% compared to the same time last year, as fluctuating mortgage rates and a near all-time low level of inventory continue to influence home sales.

New Listings were down 33.2 percent for single-family homes and 28.7 percent for condominium properties. Closed Sales decreased 23.2 percent for single-family homes and 21.2 percent for condominium properties.

The Median Sales Price was up 4.0 percent to \$650,000 for single-family homes but remained flat at \$550,000 for condominium properties. Months Supply of Inventory decreased 27.8 percent for single-family units and 15.8 percent for condominium units.

Nationwide, total housing inventory increased 3.8% from the previous month, for a 3-month's supply at the current sales pace. The shortage of homes for sale has kept prices high for remaining buyers, with a national median sales price of \$396,100 as of last measure, a 3.1% decline from the same time last year and the largest annual decrease since December 2011, according to NAR. As demand continues to outpace supply, properties are selling quickly, with the majority of homes listed for sale on the market for less than a month.

Historical Median Sales Price by Month

Housing Affordability Index

This index measures housing affordability for the region. For example, an index of 120 means the median household income is 120% of what is necessary to qualify for the median-priced home under prevailing interest rates. A higher number means greater affordability.

| | Single-Family | YoY Change | Condominium | YoY Change |

Historical New Listings by Month

Glossary of Terms

A research tool provided by the Massachusetts Association of REALTORS®

| Closed Sales | A measure of home sales that were closed to completion during the report period. |
|---|--|
| Median Sales Price | A measure of home values in a market area where 50% of activity was higher and 50% was lower than this price point. |
| Housing Affordability Index | A measure of how affordable a region's housing is to its consumers. A higher number means greater affordability. The index is based on interest rates, median sales price and average income by county. |
| Inventory of Homes for Sale | A measure of the number of homes available for sale at a given time. Once a listing goes pending, sold or is taken off the market, it is no longer considered "active." The availability of homes for sale has a big effect on supply-demand dynamics and home prices. |
| Months Supply of Inventory | The inventory of homes for sale (at the end of a given month) divided by the average monthly pending sales from the last 12 months. |
| Final Days on Market Until Sale | A measure of how many calendar days pass between when a listing becomes active (not pending) for the last time to the last time it goes pending directly before it is sold. A pending sale is defined as something classified as Pending, Active with a Flag, Contingent or Under Agreement. |
| Cumulative Days on Market Until Sale | A measure of the average number of calendar days that pass from when a listing is first listed to when a property goes into the last pending status before it is sold. |
| Percent of Original List Price Received | This is calculated as Total Sold Dollars (all sold prices added together) divided by Total Original Price (all original list prices added together). |
| New Listings | A measure of how much new supply is coming onto the market from sellers. It is calculated by counting all listings with a list date in the reporting period. |
